

IN THE CLAIMS

Kindly add the new claims as indicated below.

210
1 32. (New) A multi-layer, wound golf ball comprising:
2 a solid center;
3 at least one intermediate layer disposed over the center;
4 a wound layer of a tensioned material disposed over the at least one intermediate layer;
5 and
6 a cover disposed over the wound layer;
7 wherein the at least one intermediate layer comprises a thermoplastic material;
8 wherein the golf ball has a compression from about 50 to 120; and
9 wherein the golf ball has a coefficient of restitution of greater than about 0.7.

1 33. (New) The golf ball of claim 32, wherein the wound layer has a thickness less than 1
2 mm.
